## Policy Brief: Proposed Amendments to Rule 6A-1.0998271 (Schools of Hope)

The State Board of Education is proposing amendments to implement Senate Bill 2510 (2025). These changes establish new procedures for Schools of Hope (SOH) to co-locate within underused, vacant, or surplus school district facilities.

### Facility Utilization & Eligibility

To determine which facilities are eligible for co-location, the rule introduces specific metrics:

- **Facility Utilization Rate:** Calculated by dividing the total capital outlay full-time equivalent (COFTE) student enrollment by the total student stations per the Florida Inventory of School Houses (FISH) report. Defines schools at 90% or more facility capacity are "fully used," excluding them from being deemed underused, vacant, or surplus.
- **Weighted Enrollment:** Students receiving Level IV or V supports (ESE) in self-contained classrooms for at least 50% of the day count as **2.0 COFTE** for this calculation.
- **Eligibility Thresholds:** A facility is eligible if it has a utilization rate of 75% or less OR a surplus of at least 400 student stations.
- **Exclusions:** Facilities that first received occupancy or were placed into service within the previous four years are ineligible for co-location.

Schools of Hope are not eligible to open inside buildings that opened within the past four years.

### Operator Designation & Requirements

In addition to existing standards, an entity must meet specific performance and financial standards to be designated a Hope Operator:

- Student achievement exceeds the district and state averages where they currently operate.
- Average college attendance rates at their high schools exceed 80%.
- Over 70% of enrolled students are eligible for free/reduced-price lunch.
- The operator is in good standing with authorizers and has audited financial statements free of material misstatements.

### Establishment & Co-location Process

1. **SOH Building Notice:** Operators must submit a notice to the District Superintendent and the Department of Education between one and two years before the planned opening.
2. **Limitations:** A Hope Operator may submit no more than five Building Notices statewide within a 12-month period.
3. **District Objections:** Districts have 20 business days to object, but only on the grounds of material impracticability.
4. **Agreements:** Within 30 days of finalizing a facility choice, the parties must agree on a Shared Facility Plan (for space allocation) and a Mutual Management Plan (for maintenance and services).

### Operational & Financial Terms

- **Mutual Management Plan:** This plan governs facility-related services. While districts must provide space at **no cost**, they may charge the operator for the additional incremental costs of utilities, custodial services, nursing, and food services resulting directly from the SOH's use.
- **Safety and Transportation:** If an SOH uses district security or transportation, it must remit the full amount of its state allocations for those services (e.g., Florida Safe Schools Allocation) to the district.
